PEB Leader Interarch Announces ₹70 Cr Investment in new plant in Kheda to expand presence, reaffirm commitment to Gujarat

- *Manufacturing facility will have 40,000 MT capacity, create over 400 jobs in the region*
 - *Expansion supports Interarch's FY28 growth target of Rs 2,400 crore*

08th October 2025: Interarch Building Solutions Limited (BSE: 544232 | NSE: INTERARCH), a leader in pre-engineered steel buildings, will break ground for its new manufacturing facility in Kheda, Gujarat, on 9th October. The move will strengthen the company's pre-engineered building (PEB) footprint and commitment in Gujarat, one of the fastest growing industrial states in India. Gujarat is already home to some of Interarch's largest and most prestigious projects.

The new state-of-the-art facility, being developed on a 12-acre site, will complete Interarch's pan-India manufacturing presence and strengthen its ability to serve high-growth sectors across West and Central India. The new facility will have an installed capacity of 40,000 MT in its first phase and will involve an investment of approximately ₹70 crore. Strategically located near prominent ports, the facility will also support exports, extending Interarch's reach into international markets. Designed as one of the most modern and fully synchronized PEB manufacturing facilities in the country, the Gujarat facility will set new benchmarks for efficiency, automation, and performance. The project is expected to generate over 400 direct and indirect jobs, bolstering Gujarat's role as a manufacturing hub while driving regional economic development.

Commenting on the announcement, **Mr. Manish Garg, CEO of Interarch Building Solutions Limited**, said, *"The groundbreaking of our Gujarat facility is a significant milestone for Interarch. Gujarat, with its world-class infrastructure and strong clusters in semiconductors, EVs, and allied industries, offers the perfect ecosystem for our growth. With this expansion, we will not only complete our pan-India footprint but also enhance our capacity by 40,000 MT, enabling us to serve both domestic and international demand more effectively. This investment reinforces our commitment to building the future in steel and contributing to India's economic strength."*

Interarch, a leading PEB player in Gujarat, is currently executing India's first semiconductor chip manufacturing unit in Sanand, a large tyre manufacturing facility in Bhuj, a complex manufacturing facility in Bharuch, a solar energy plant in Jamnagar, and many more such projects.

The company has in the past executed complex and high-value projects for Adani, Aditya Birla, Reliance Energy, BKT Tyre, Asian Paints, MG Motors, and many more such organisations. The new plant in Kheda, coupled with Interarch's strong existing capacities in North and South India, is expected to further cement the company's leadership in the PEB industry.

Interarch is targeting a turnover of around ₹2,400 crore by FY28, driven by capacity additions, growing demand in sectors such as renewables, EVs, semiconductors, data centres, and continued innovation in modular steel construction.

About Interarch Building Solutions Limited

Interarch Pre- Pre-Engineered Buildings

Interarch Building Solutions Limited
(Formerly known as Interarch Building Products Limited)

CIN: L45201DL1983PLC017029

Registered Office: Farm No-8, Khasara no. 56/23/2, Dera Mandi Road, Mandi Village, Tehsil Mehrauli, New Delhi-110047

Corporate Office: B-30, Sector 57, Noida – 201301, India

Interarch Building Solutions Limited commenced its operations in 1983. Today, 40 years later, Interarch is one of the leading turnkey pre-engineered steel construction solution providers in India with integrated facilities for design and engineering, manufacturing, and on-site project management capabilities for the installation and erection of pre-engineered steel buildings.

TRACDEK® Metal Roofing & Cladding Systems

We manufacture world-class pre-engineered roofing and cladding systems designed to meet custom requirements. Our extensive portfolio includes the Hi-Rib Roofing & Cladding System, Klippon Roofing & Cladding System, and SS-2000 Standing Seam Roofing System. Each of these solutions is engineered to provide exceptional performance and durability, ensuring that we meet a wide range of needs with precision and reliability.

Trac® Ceilings

Our TRAC® range of metal ceilings are manufactured from fully recyclable materials and are pre-painted and prefabricated in our factory. The ceiling systems are friendly to handle and will not promote the growth of bacteria and fungi. TRAC® ceilings exhibit excellent corrosion resistance. They can withstand very high humidity (up to 100 %) and are suitable for use in outdoor applications.

Interarch Life: Non-Industrial Buildings

We offer a state-of-the-art solution for non-industrial buildings through our innovative load-bearing wall framing systems, crafted to support lightweight structures. Embracing a hassle-free drywall construction approach, these systems guarantee swift and efficient assembly, simplifying the construction process for our esteemed clients. With a focus on durability and safety, our load-bearing wall framing systems are engineered to be earthquake and termite-proof, providing robust protection for the structure and its occupants.

Moreover, these systems offer the flexibility of dismantling if required, providing adaptability for future changes or modifications. These structures can be custom-made according to the specific plans, accommodating varying shapes, sizes, and designs to meet the exact needs of customers.
